Jaydeep Gondaliya

Software Engineer | Full-Stack & Mobile Developer
jaydeepgondaliya182@gmail.com | (626) 625-5783 | LinkedIn | GitHub | Portfolio | Los Angeles, CA

SUMMARY

Software developer with a Master's in Computer Science and hands-on experience building full-stack web and mobile applications, including a cross-platform React Native app for iOS and Android. Currently modernizing legacy client websites into full-stack platforms with mobile-ready REST APIs. Strong backend foundation in Node.js, Java and Spring Boot, with Git-based Agile teamwork and AWS/Azure deployment. Actively building iOS skills in Swift, UIKit and Core Data.

SKILLS

- **Mobile Development:** React Native (iOS & Android), Firebase (Firestore, Auth, Push Notifications), REST API integration in mobile apps, cross-platform UI
- **iOS (currently learning):** Swift, SwiftUI, UIKit, Core Data, Core Animation, Xcode
- **Languages & Backend:** JavaScript, TypeScript, Python, Java, Node.js, Express.js, Spring Boot, RESTful APIs, GraphQL
- **Frontend:** React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Material UI, Responsive Design
- **Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Cassandra, query optimization, caching
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Azure (App Services, AKS, Azure SQL), Docker, Kubernetes, CI/CD
- **AI & Integrations:** LLM integration (OpenAI, Mistral, Ollama), LangChain/LangGraph, prompt engineering, Stripe, GoHighLevel CRM, Shopify
- **Tools & Process:** Git, GitHub, GitLab, code reviews, Agile/Scrum, OAuth2/JWT, Swagger/OpenAPI, JUnit, Postman

PROFESSIONAL EXPERIENCE

Zevrona — Software Developer Aug 2026 – Present | Los Angeles, CA

- Modernizing legacy static HTML websites for multiple small-business clients into full-stack applications with a Next.js/React front end, Node.js/Express backend and database layer.
- Architecting a shared platform used across all client projects, with reusable modules for login, email notifications and Stripe payments that are cloned and adapted per client.
- Designing mobile-ready REST APIs so each client platform can be extended to iOS and Android apps without rebuilding the backend.
- Building user and admin dashboards for a home-services client, including finance monitoring and customer data capture for marketing.
- Designing a ticketing, fan-engagement and finance platform for a Regional Mexicano concert promoter, integrating the Ticketmaster API with admin finance and audience tracking.
- Integrating GoHighLevel CRM across client sites and building AI agents (LangChain/LangGraph) to automate Shopify inventory sync and listings.

Studiobloomla — Software Developer Jan 2026 – Aug 2026 | USA

- Designed and developed a full-stack platform from scratch using Node.js and React.js, supporting multiple service offerings in one application.
- Built and integrated an AI-driven financial analysis tool to evaluate client credit and financial data, automating funding-eligibility assessment.
- Developed backend services and automation workflows for data processing, validation and decision logic, speeding up client onboarding.

Pyramid Inc. — Software Developer Intern Aug 2025 – Jan 2026 | USA

- Built and maintained web applications with Node.js, React.js and TypeScript for telehealth scheduling, contributing to a 22% reduction in missed consultations.
- Optimized RESTful and GraphQL APIs for EHR and pharmacy systems, cutting response latency from 1.9s to 400ms with query optimization, Redis caching and PostgreSQL indexing.

Koios Enterprises LLC — Full Stack Developer Oct 2025 | USA

- Developed RESTful APIs for service listings, enabling dynamic service configuration in a React-based marketplace.
- Implemented role-based authorization to secure API endpoints across user roles and services.

California State University, Los Angeles — Graduate Research Assistant Feb 2025 – Oct 2025 | USA

- Migrated an NLP research system from cloud LLM APIs (OpenAI, Mistral) to locally hosted open-source models with Ollama, cutting token costs by about 90%.
- Optimized the thematic analysis algorithm for the local models, improving thematic accuracy by 12% and analysis speed by 75%.

PROJECTS

Restaurant Mobile App (iOS & Android) React Native, Firebase, Node.js | GitHub

- Built a cross-platform mobile app for iOS and Android with real-time menu updates, digital payments, order tracking and secure user authentication.
- Added QR-based table booking, live customer-traffic dashboards, revenue analytics and push notifications, using Firestore for multi-device sync.

Early Skin Cancer Detection TensorFlow, CNN, NumPy, Pandas | GitHub

- Built a convolutional neural network that classifies skin lesions as malignant or benign, reaching 93.4% accuracy and 0.94 AUC.

EDUCATION

Master of Science in Computer Science — California State University, Los Angeles May 2025 | GPA 3.89/4

Bachelor of Engineering in Computer Engineering — Gujarat Technological University Jul 2017 | GPA 3.44/4
